The UK Consumer Price Index is not the official benchmark of the Fund and is only being used for comparative purposes. Shareholders may compare the performance of the Sub-Fund against the UK Consumer Price Index. The ACD has selected this comparator benchmark as it reflects the absolute returns above inflation. The benchmark is not a target for the Sub-Fund, nor is the Sub-Fund constrained by the benchmark.

Commentary

The Balanced Portfolio Fund seeks to generate long-term capital growth at a lower risk than that associated with pure equity market investment through active management of a well diversified multi-asset portfolio. The Fund launched on 1st December 2016 and the portfolio structure and strategy is broadly in line with the existing larger offshore version of the fund (the Guernsey regulated Heritage Managed Portfolio Fund that has a successful 20 year track record).

The Fund had a strong month in March taking the first quarter and year-to-date return to 2.78%. It is also pleasing that the Fund price has now returned to a new high following a strong recovery from the Covid induced weakness in the first quarter of last year. The first quarter is always a busy time for companies reporting year end results and we are pleased to say that most of our holdings were able to report encouraging progress despite a very challenging year in 2020, and even those that are in sectors that were hit hardest by the lockdowns have seen their share prices recover as the market begins to anticipate a re-opening thanks to the successful vaccine rollout.

Whilst there has been concern over rising yields in government bond markets this quarter, our portfolio of higher yielding corporate bonds has continued to perform steadily and generates a very healthy yield of over 6.5% and our property holdings also provide a decent income yield with the added benefit of potential long-term growth.

Although the outlook remains uncertain, we believe that our portfolio of investments is well positioned to generate attractive returns for long-term investors, whilst our relatively defensive positioning should provide some protection against the risks of market weakness.

Asset Allocation

The equity content consists predominantly of profitable companies on attractive valuations as well as some international and specialist funds including private equity.

The preference shares and convertibles consist of zero dividend preference shares and bonds that have an option to convert into ordinary shares.

The property exposure is through funds and REITs that invest directly in commercial property as well as property company shares.

The corporate bond holdings consist of investment grade as well as some higher yield bonds and include both fixed and floating rate bonds.

Cash is held to manage risk and to provide liquidity.
