Apr-21	3.68%	0.06%

Since 2001	6.41%	2.04%	Compound annual return
------------	-------	-------	------------------------

Risk

Overall the Fund's conservative approach and well diversified, multi-asset portfolio results in a relatively low risk profile compared to an index of shares (such as the FTSE 100).

	Best return over :				Worst return over :			
	1 year	3 years	5 years	10 years	1 year	3 years	5 years	10 years
Heritage Managed Portfolio Fund	24.8%	55.6%	85.2%	140.9%	-19.5%	-11.3%	16.7%	63.6%
Equity index	44.7%	60.0%	73.8%	85.4%	-34.9%	-33.8%	-14.7%	-10.0%

Asset allocation

The equity content consists predominantly of profitable companies on attractive valuations as well as some international & specialist funds including private equity.

The preference shares and convertibles consist of zero dividend preference shares and bonds that have an option to convert into ordinary shares.

The property exposure is through funds and REITs that invest directly in commercial property as well as property company shares.

The corporate bond holdings consist of investment grade as well as some higher yield bonds and include both fixed and floating rate bonds.

Cash is held to manage risk and to provide liquidity.

Commentary

The Managed Portfolio Fund seeks to generate long-term capital growth at a lower risk than that associated with pure equity market investment through active management of a well diversified multi-asset portfolio.

The Fund had a strong month in April with a gain of 3.68% taking the year-to-date return to 6.44%. The Fund also passed a couple of notable milestones with the price passing above £350 and the size increasing to over £200 million.

Pleasingly there were a number of strong contributions from some of our largest share holdings with Intermediate Capital, T Clarke, Computacenter and Lancashire all up over 10%, as was recent new holding, Clinigen. Other notable contributions this month came from our bank and healthcare holdings and our listed private equity funds also performed well.

Property also had a positive month due to good rent collection figures for the first quarter and improving prospects for a recovery, with TR property, Regional REIT and CLS Holdings all up over 7%.

Finally our portfolio of higher yielding corporate bonds and preference shares has continued to perform well and generates a healthy yield of over 6%.

Although the near term outlook remains uncertain, we believe that our portfolio of investments is well positioned to generate attractive returns for long-term investors, whilst our relatively defensive positioning should provide some protection against the risks of market weakness.

Investors should be aware that past results are not a guide to future performance and that the value of investments can fall as well as rise. The information set out above does not constitute an offer to subscribe for shares, which may only be purchased under the terms of the Explanatory Memorandum.
