The UK Consumer Price Index is not the official benchmark of the Fund and is only being used for comparative purposes. Shareholders may compare the performance of the Sub-Fund against the UK Consumer Price Index. The ACD has selected this comparator benchmark as it reflects the absolute returns above inflation. The benchmark is not a target for the Sub-Fund, nor is the Sub-Fund constrained by the benchmark.

### Commentary

The Balanced Portfolio Fund seeks to generate long-term capital growth at a lower risk than that associated with pure equity market investment through active management of a well diversified multi-asset portfolio. The Fund launched on 1st December 2016 and the portfolio structure and strategy is broadly in line with the existing larger offshore version of the fund (the Guernsey regulated Heritage Managed Portfolio Fund that has a successful 20 year track record).

It has been a weak start to the year for global markets generally, with the Russian invasion of Ukraine and rising inflation being the major concerns and the Fund has held up relatively well to end the quarter down by 3.16%.

The majority of our holdings have been negatively impacted by the general market volatility this quarter and positive contributions were limited to a few individual companies that have been reporting strong trading news such as Bloomsbury Publishing and AstraZeneca, or resources companies including BHP and Shell that are benefitting from rising commodity prices. We also received a boost from a take-over at a 40% premium for our holding in our small cap aircraft broker Air Partner.

Our property holdings had a mixed quarter with falls from most holdings balanced by a 15% jump in the price for Circle Property where positive action is being taken by the board to reduce the discount to the underlying net asset value and positive progress by Secure Income and Supermarket Income REITs.

It continues to be a tough environment for bonds generally, with rising interest rates and inflation hurting investment grade bond prices and general risk aversion weighing on higher yielding bonds, although overall we remain comfortable with our portfolio of fixed interest securities which yields over 6.5%.

Although the current outlook remains uncertain, we believe that our portfolio of investments is well positioned to generate attractive returns for long-term investors, whilst our relatively defensive positioning should provide some protection against the risks of further market weakness.

### Asset Allocation

The equity content consists predominantly of profitable companies on attractive valuations as well as some international and specialist funds including private equity.

The preference shares and convertibles consist of zero dividend preference shares and bonds that have an option to convert into ordinary shares.

The property exposure is through funds and REITs that invest directly in commercial property as well as property company shares.

The corporate bond holdings consist of investment grade as well as some higher yield bonds and include both fixed and floating rate bonds.

Cash is held to manage risk and to provide liquidity.
