The UK Consumer Price Index is not the official benchmark of the Fund and is only being used for comparative purposes. Shareholders may compare the performance of the Sub-Fund against the UK Consumer Price Index. The ACD has selected this comparator benchmark as it reflects the absolute returns above inflation. The benchmark is not a target for the Sub-Fund, nor is the Sub-Fund constrained by the benchmark.

Commentary

The Balanced Portfolio Fund seeks to generate long-term capital growth at a lower risk than that associated with pure equity market investment through active management of a well diversified multi-asset portfolio. The Fund launched on 1st December 2016 and the portfolio structure and strategy is broadly in line with the existing larger offshore version of the fund (the Guernsey regulated Heritage Managed Portfolio Fund that has a successful 20 year track record).

It was another weak month for global equity markets, weighed down by continuing concerns over the Russian invasion of Ukraine and rising inflation and the Fund was down by 0.42% this month and by 3.56% for the year-to-date.

A large number of our holdings have been negatively impacted by the general market weakness this month, although there were a few notable exceptions – Rathbones was up 15% on the back of a take-over bid for fellow wealth manager Brewin Dolphin at a large premium and our Schroders non-voting shares were up 22% on news that they are to be enfranchised. We received the take-over proceeds from our holdings in Clinigen and Air Partner in April but are not in a rush to reinvest the funds and will look to selectively add to existing favoured holdings and continue to look for new opportunities over the summer months.

It continues to be a tough environment for bonds generally, with rising interest rates and inflation hurting investment grade bond prices and general risk aversion weighing on higher yielding bonds. Having said that, our largest fixed interest holding, the REA 9% preference shares are up over 10% this year, as the company has enjoyed stronger trading and been able to strengthen its balance sheet.

Although the current outlook remains uncertain, we believe that our portfolio of investments is well positioned to generate attractive returns for long-term investors, whilst our relatively defensive positioning should provide some protection against the risks of further market weakness.

SVS HERITAGE BALANCED PORTFOLIO FUND

30-Apr-22

Asset Allocation

The equity content consists predominantly of profitable companies on attractive valuations as well as some international and specialist funds including private equity.

The preference shares and convertibles consist of zero dividend preference shares and bonds that have an option to convert into ordinary shares.

The property exposure is through funds and REITs that invest directly in commercial property as well as property company shares.

The corporate bond holdings consist of investment grade as well as some higher yield bonds and include both fixed and floating rate bonds.

Cash is held to manage risk and to provide liquidity.
